Tom 220–225, 1975

Vol. 16, Nos. 1–6 January–December 1975 Pages 1–1646

ANNUAL INDEX OF AUTHORS

Alimov, Š. A. *On the uniform convergence of spectral decompositions of functions in* H_p^a 660

Al'pin, Ju. A. and Buharaev, R. G. *A sufficiency test for the nonrepresentability of languages in finite-state probabilistic automata* 971

Aminov, Ju. A. *On the problem of stability of a minimal surface in a Riemannian space of positive curvature* 1278

Amstislavskiĭ, V. I. *On recursive characterizations of sets obtainable by means of* R^c*-operations* 1160

Andrejanov, P. A. See Kružkov, S. N.

Andrunakievič, V. A. and Rjabuhin, Ju. M. *On some classes of weakly Boolean rings* 1111

Antonec, M. A., Žislin, G. M. and Šereševskiĭ, I. A. *On a reduction in the investigation of the discrete spectrum of many-particle Hamiltonians* 688

Apanasov, B. N. *On an analytic method in the theory of Kleinian groups on a multidimensional Euclidean space* 553

A universal property of Kleinian groups in the hyperbolic metric 1418

Aranson, S. H. *On some arithmetic properties of dynamical systems on two-dimensional manifolds* 605

Arhipov, G. I. and Čubarikov, V. N. *On multiple trigonometric sums* 705

Arsen'ev, A. A. *On the existence of statistical solutions of the Vlasov system of equations* 216

Construction of a turbulent measure for the system of Navier-Stokes equations 1422

Atahodžaev, M. A. *On a conditionally correct problem for the biharmonic equation* 793

Avramov, L. L. *Flat morphisms of complete intersections* 1413

Babaev, Dž. A. *The method of hyperspheres for solving discrete programming problems* 435

Babat, L. G. *Linear functions on the N-dimensional unit cube* 398

Babenko, K. I. *Some remarks on the discretization of elliptic problems* 263

Baderko, E. A. *On the solution of boundary value problems for 2p-parabolic equations in domains with curvilinear lateral boundaries* 1425

Bagijan, R. A. See Džrbašjan, M. M.

Bahvalov, N. S. *Averaging of partial differential equations with rapidly oscillating coefficients* 351

Bahvalov, N. S. *Averaging of nonlinear partial differential equations with rapidly oscillating coefficients* 1469
Bakunin, G. N. (see also Bavrin, I. I.)
On integral representations and an operator problem in unbounded bicircular polyhedra 1428
Baranovskiĭ, E. P. (see also Ryškov, S. S.)
Baranovskiĭ, E. P. and Ryškov, S. S. *The combinatorial-metric structure of L-partitions of general five-dimensional lattices* 47
Bartoševič, M. A. *On a class of Watson transforms* 129
Baškirov, A. I. *Infinite products of k-spaces* 1320
Bavrin, I. I. *General integral representations of Temljakov, Schwarz-Temljakov and Poisson-Temljakov with n-dimensional defining manifold in the space C^n* 348
General integral representations for holomorphic functions of several complex variables with n-dimensional defining manifolds in C^n 796
Bavrin, I. I. and Bakunin, G. N. *Parametric assignment of domains of type (T_1) and Temljakov's integral formula* 845
Bavrin, I. I., Gusakov, V. A. and Ležnev, V. G. *Integro-differential operators and the generalized integral formulas of Cauchy, Schwarz and Poisson* 1485
Beljaev, Ju. K. and Mal'kov, A. N. *Completeness of families of probability measures in inspection by first occurrence schemes* 1432
Beljankov, A. Ja. *Correctness constants for a difference operator* 268
Belov, Ju. Ja. *On approximation of a class of systems of linear differential equations* 134
Benderskiĭ, Ju. V. *Rapid computations* 1005
Berezin, F. A. and Leĭtes, D. A. *Supermanifolds* 1218
Berhin, P. E. *A selfadjoint boundary-value problem for the system $*du + \lambda u = f$* 557
Berman, D. L. *Divergent extended trigonometric interpolation processes* 356
Bibikov, Ju. N. *Application of a theorem of Moser to the investigation of differential equations of nonlinear oscillations* 1603
Bicadze, A. V. *On an equation of the gravitational field* 693
On the question of formulating the characteristic problem for second-order hyperbolic systems 1062
The influence of the minor terms on the correctness of the formulation of characteristic problems for hyperbolic systems of second order 1437
Birjukova, L. A. *On the l-completeness of functions with delays* 1223
Bliev, N. K. *On a class of elliptic systems of first-order differential equations* 171
Bočkarev, S. V. *Logarithmic growth of arithmetic means of Lebesgue functions of bounded orthonormal systems* 799
A Fourier series in an arbitrary bounded orthonormal system that diverges on a set of positive measure 1441
Bogačev, B. M. See Kiprijanov, I. A.
Bogatyĭ, S. A. *On the preservation of shapes under mappings* 1164

Boglaev, Ju. P. and Ždanov, A. V. *Singularly perturbed integral equations with Cauchy type kernels* 1551
Boĭkov, I. V. *The approximate solution of singular integral equations* 1367
Boĭmatov, K. H. *The distribution of eigenvalues of elliptic operators* 314
L_2-estimates of generalized solutions of elliptic differential equations 899
Bondarenko, V. A. and Zabreĭko, P. P. *The superposition operator in Hölder function spaces* 739
Borovskih, Ju. V. *On Kolmogorov's goodness-of-fit test for samples from finite populations* 219
Brahman, A. L. *On the adjunction of a boundary to a regular covering of a closed manifold* 496
Brjuno, A. D. *Integral analytic sets* 224
Buharaev, R. G. See Al'pin, Ju. A.
Buhvalov, A. V. *On the duality of functors generated by partially ordered spaces* 175
Bunjatov, M. R. *Kolmogorov cohomology for abstract boolean algebras with closure* 1116
Uniform boolean algebras 1169
Burenkov, V. I. *On the extension of functions with preservation and with deterioration of the differential properties* 1174
Buslaev, V. I. *Some inequalities for polynomials with real coefficients* 803
Caljuk, I. M. *Extremal problems for Hardy classes of vector valued functions* 1155
Castro, A. = Kastro, A.
Čebotarev, A. M. (see also Maslov, V. P.)
T-mapping and functional integrals 1536
Čencov, A. G. *A condition for a maximin in a game problem of programmed control* 309
On the structure of a game problem of convergence 1404
Černikov, N. S. *Groups with minimal conditions for uncomplemented abelian subgroups* 996
Černoljas, V. I. *On the distribution of zeros of entire functions of generalized completely regular growth of variable order* 1269
Čertanov, G. I. *Products of linearly ordered spaces and continuous mappings* 1102
Čibrikova, L. I. and Kulagina, M. F. *On a representation of a meromorphic function and its application* 1204
Čistjakov, G. P. *On a problem of Duguć* 1315
Čubarikov, V. N. See Arhipov, G. I.
Čuešev, V. V. *On the moduli of Schottky groups* 163
Schottky spaces of the type (g, s, m) 1107
Čunihin, S. A. *Subgroups with a common component* 1208
On the conjugacy of subgroups of finite groups 1598
Danilevič, A. A. *Some applications of abstract analytic functions to the investigation of boundary properties of series of holomorphic functions* 816
Daugavet, V. A. and Malozemov, V. N. *Alternance properties of solutions of nonlinear minimax problems with nonconvex constraints* 1474

Davydov, Ju. A. *On the behavior of certain functionals of processes attracted to a semistable process* ... 326
Dididze, C. E. See Plotkin, B. I.
Dmitriev, M. G. See Glizer, V. Ja.
Dubinskiĭ, Ju. A. *On nonlinear elliptic equations of infinite order and the non-triviality of the corresponding Sobolev spaces* ... 565
Sobolev spaces of infinite order on the torus and some questions in the theory of periodic solutions of differential equations ... 610
Dudučava, R. V. *On bisingular integral operators and convolution operators on a quadrant* ... 330
Bisingular integral operators and boundary value problems of the theory of analytic functions in spaces of generalized functions ... 1324
Dynin, A. S. *Pseudodifferential operators on the Heisenberg group* ... 1608
Džafarov, Arif S. *Classes of functions on a hypersphere admitting an application of the Laplace operator* ... 909
Dzjadyk, Ju. V. *On the determination of the spectrum of an induced representation on a compact symmetric space* ... 193
Representations realizable in vector fields on compact symmetric spaces 229
Dzjadyk, V. K. *An application of the methods of the theory of quasi-conformal mappings to obtain direct theorems for the approximation of functions* 1487
Džrbašjan, M. M. and Bagijan, R. A. *On integral representations and measures associated with functions of Mittag-Leffler type* ... 1072
Džrbašjan, M. M. and Martirosjan, V. M. *Theorems of Paley-Wiener and Müntz-Szász type* ... 1559
Džuraev, A. *On the eigenvalues of a two-dimensional singular integral equation* ... 560
On properties of some degenerate elliptic systems of first order in the plane ... 914
On a method of investigating systems of first-order equations in three-dimensional space ... 1019
Efremovič, V. A. See Vaĭnšteĭn, A. G.
Èĭdel′man, S. D. See Porper, F. O.
Èĭjubov, R. A. *On a boundary-value problem for an elliptic equation with a small parameter* ... 394
Erëmin, Ju. A. See Svešnikov, A. G.
Evstigneev, I. V. *Models of economic dynamics taking account of indeterminacy in the operation of an industrial process* ... 919
Evtušenko, Ju. G. *Numerical methods in nonlinear programming* ... 443
Fal′, A. M. *The limit distribution of an additive functional of the simplest Markov random walk* ... 1515
Farber, M. Š. *Linking coefficients and two-dimensional knots* ... 647
Fedorčuk, V. V. *Compatibility of some theorems of general topology with the axioms of set theory* ... 160

Fedorčuk, V. V. *On the cardinality of hereditarily separable compact Hausdorff spaces* 651
Fedotova, Z. I. and Šokin, Ju. I. *Invariant difference schemes with a polynomial viscosity matrix* 601
Feller, M. N. *On the solvability of infinite-dimensional selfadjoint elliptic equations* 480
Formanov, Š. K. *On invariance principles for homogeneous Markov chains* 301
Gabdulhaev, V. G. *Approximation in H-spaces and applications* 1067
Gallo, V. F. and Suvorov, G. D. *Sets of monogeneity of plane, continuous ring mappings* 663
Gapoškin, V. F. *Criteria for the strong law of large numbers for classes of stationary processes and homogeneous random fields* 1009
Gargov, G. K. *Intuitionistic analysis and intermediate logics* 1372
Gasymov, M. G. and Iskenderov, B. A. *The principle of limiting amplitude for a hyperbolic equation with constant coefficients* 184
Gel′man, B. D. *The topological characteristic of multivalued mappings and fixed-point theorems* 360
Gel′man, I. V. and Maz′ja, V. G. *On the dominance of differential operators with constant coefficients in a half-space* 365
Genčev, T. G. *A generalization of S. N. Bernšteĭn's inequality for trigonometric polynomials* 806
Gendler, M. B., Rozenblat, M. A. and Rubčinskiĭ, A. *Structural properties of homogeneous circuits with saturation-type limiters* 1226
Germeĭer, Ju. B. and Štil′man, M. S. *Noncooperative iterated games with arbitrary discounting* 276
Geronimus, Ja. L. and Medvedeva, A. K. *The validity of "Čebyšev's principle" for a two-parameter family of weight functions* 1231
Glizer, V. Ja. and Dmitriev, M. G. *Singular perturbations in a linear optimal control problem with quadratic functional* 1555
Glušak, A. V. *Solvability of the Dirichlet problem for a degenerate elliptic equation in a sector of the plane* 1014
Godunov, A. N. and Solov′ev, A. N. *The Gibbs phenomenon and approximation properties of summation methods for Fourier series* 849
Gol′dman, M. A. and Kračkovskiĭ, S. N. *Behavior of the space of zero elements with finite-dimensional salient on the Riesz kernel under perturbations of the operator* 370
Gol′dšteĭd, I. Ja. *Asymptotics of the product of random matrices depending on a parameter* 1375
Gol′dšteĭn, M. Š. and Služevskiĭ, È. F. *Certain questions in the theory of closed Riemann surfaces* 143
Gol′dšteĭn, V. M. See Vodop′janov, S. K.
Golodec, V. Ja. *Asymptotic algebra, its applications to the study of modular operators and their spectral properties* 6

Golovin, V. D. *On the global dimension of the sheaf of germs of holomorphic functions* 853
Homology of analytic sheaves 1447
Gorbačuk, M. L. See Vaĭnerman, L. I.
Gorbunov, A. D. and Kučerenko, È. I. *On the question of solvability of a two-point boundary-value problem for an ordinary differential equation* 105
Gor′kov, Ju. P. *A formula for the solution of a boundary value problem for the stationary equation of Brownian motion* 904
Govorov, V. M. *Integrability of the first derivatives of a classical solution of a mixed problem for a parabolic equation in a noncylindrical domain* 1525
Grabovskaja, R. Ja., Kononenko, V. I. and Osipov, V. B. *On a family of generalized shift operators* 811
Grebennikov, A. I. See Morozov, V. A.
Grincevičjus, R. K. *On the solution of the Dirichlet problem for elliptic equations in domains with piecewise smooth boundary* 322
Gudovič, N. N, *On the convergence of difference schemes for ordinary differential equations* 981
On the stability of difference schemes for linear ordinary differential equations 1282
Gurevič, B. M. and Suhov, Ju. M. *Stationary solutions of the chain of Bogoljubov equations in classical statistical mechanics* 857
Gurielašvili, R. I. *On the convergence and boundedness in $\psi(L)$ of the Fourier series of a monotone function* 188
Gurov, L. G. *On the stability of Lorentz mappings. Estimates for derivatives* 56
Gusakov, V. A. See Bavrin, I. I.
Gutnikov, E. V. See Vasilevskiĭ, N. L.
Hadžiev, Dž. See Sarymsakov, T. A.
Haĭdarov, A. H. *On an inverse problem of potential theory* 428
Harazišvili, A. B. *An example of an invariant measure* 43
On nonelementary measures 85
On some types of invariant measures 681
Henkin, G. M. *Solutions with estimates of the H. Lewy and Poincaré-Lelong equations. The construction of functions of a Nevanlinna class with given zeros in a strictly pseudoconvex domain* 1310
Hil′debrand, F. *The first boundary-value problem "in the large" for a quasi-linear equation of first order* 88
Himčenko, B. N. See Kamynin, L. I.
Holščevnikova, N. N. *Limits of indeterminacies of regular transformations in linear topological spaces* 1593
Hudak, Ju. I. *On the regularization of operator equations of the first kind* 305
Hvostov, A. T. *An integral representation for functions of two complex variables analytic in circular domains* 837
Ibragimov, A. I. *On the behavior on the boundary of solutions of a degenerate second-order elliptic equation* 1234

Ibragimov, I. I. and Kasimov, È. I. *On a basis system for analytic functions and its application to the Abel-Gončarov interpolation problem* 668
Ibragimov, I. I. and Kušnirčuk, I. F. *On the completeness of the system of eigenfunctions of a class of partial differential operators* 709
Ibragimov, I. I. and Mamedhanov, Dž. I. *Constructive characterization of a certain class of functions* 820
Ibragimov, I. I. and Nagnibida, N. I. *Some remarks on multiple completeness of systems of analytic functions* 697
On a problem of Whittaker 744
On multiple completeness in the sense of M. V. Keldyš of a system of entire functions 871
Ibragimov, I. I., Linčuk, S. S. and Nagnibida, N. I. *On a problem of Whittaker in a class of entire functions of exponential type* 1077
Il′in, V. A. *On uniform equiconvergence of expansions in eigen and associated functions of a nonselfadjoint ordinary differential operator and in trigonometric Fourier series* 932
On the equiconvergence of an expansion in a trigonometric Fourier series and in the eigenfunctions of the Keldyš pencil of ordinary nonself-adjoint differential operators 1494
Iskenderov, A. D. *Multidimensional inverse problems for linear and quasi-linear parabolic equations* 1564
Iskenderov, B. A. See Gasymov, M. G.
Ivanov, V. I. *Local approximation of periodic functions by linear polynomial methods* 1238
Ivriĭ, V. Ja. *Conditions for the correctness in Gevrey classes of the Cauchy problem for nonstrictly hyperbolic operators* 415
Conditions that the Cauchy problem for hyperbolic operators with characteristics of variable multiplicity be well posed in Gevrey classes 501
Well-posedness in projective Gevrey classes of the Cauchy problem for nonstrictly hyperbolic operators 570
Jackin, N. I. *Questions of reducibility to a special form of linear differential equations on manifolds* 167
Jančevskiĭ, V. I. (see also Platonov, V. P.)
The commutator subgroups of simple algebras with surjective reduced norm 492
Janov, Ju. I. *On some semantic characteristics of Turing machines* 1213
Kac, I. Ja. and Kuržanskiĭ, A. B. *Minimax estimation in multistage systems* 374
Kal′neĭ, S. G. *Uniform boundedness in the L-metric of polynomials with respect to the Jacobi polynomials* 714
Kalnin, V. M. *On the application of frequency methods for studying the stability of numerical integration of differential equations* 748
Frequency estimates of errors in the numerical integration of differential equations 824
Kamenskiĭ, G. A. *On extrema of functionals with deviating argument* 1380

Kamenskiĭ, G. A. *Qualitative investigation of the spectra of differential-difference operators* 1613
Kamynin, L. I. and Himčenko, B. N. *On theorems of Giraud type for a second-order elliptic operator weakly degenerate near the boundary* 1287
Kamyšanskiĭ, N. R. See Solodovnikov, A. S.
Kanoveĭ, V. G. *On the independence of some propositions of descriptive set theory and second-order arithmetic* 937
Kanovič, M. I. *A hierarchical semantic system with set variables* 504
Dekker's construction and effective nonrecursiveness 719
Karadžov, G. E. *On the commutativity of two interpolation functors* 875
Karapetjanc, N. K. and Samko, S. G. *Singular convolution operators with a discontinuous symbol* 510
Kasimov, È. I. See Ibragimov, I. I.
Kašin, B. S. *On Weyl multipliers* 722
Kas'janov, V. N. *Distinguishing hammocks in a directed graph* 447
Kastro, A. [A. Castro] See Kružkov, S. N.
Katok, A. B. *Time change, monotone equivalence and standard dynamical systems* 986
Katrahov, V. V. *On the spectrum, eigen- and spectral functions of singular elliptic operators* 1329
Kazarjan, G. G. *On estimates of monomials in terms of a given polynomial, and a characterization of hypoellipticity* 672
Kel'zon, A. A. *On the Fourier coefficients and Fourier-Lagrange coefficients of functions of bounded higher variations* 335
Kemhadze, G. G. *Remark on the convergence of spherical partial sums of Fourier series of functions of class L^p, $p > 1$* 619
Kiprijanov, I. A. and Bogačev, B. M. *On the traces of functions in a weighted space* 1528
Kireĭtov, V. R. See Lavrent'ev, M. M.
Kisljakov, S. V. *On the conditions of Dunford-Pettis, Pełczyński and Grothendieck* 1616
Klibanov, M. V. (see also Lavrent'ev, M. M.)
On a class of inverse problems for a parabolic equation and problems of integral geometry 574
Ključancev, M. I. *On the construction of r-even solutions of singular differential equations* 1334
Kokilašvili, V. M. *On multipliers of Fourier transforms* 11
On singular integrals and maximal operators with a Cauchy kernel 941
Kokilašvili, V. M. and Paatašvili, V. A. *On the boundary value problem of linear conjugation with measurable coefficients* 1339
Kolodjažnyĭ, V. M. and Rvačev, V. A. *On approximation in the uniform metric, by functions of special form, of functions satisfying a boundary condition* 753

Kononenko, V. I. See Grabovskaja, R. Ja.
Koršunov, A. D. *The number of automata and boundedly determined functions. Hereditary properties of automata* 515
Košmanenko, V. D. *Scattering theory in terms of bilinear functionals* 1184
Kovalenko, I. N. and Levitskaja, A. A. *Limit behavior of the number of solutions of a system of random linear equations over a finite field or a finite ring* 418
Kovalenko, S. P. *Some subspace distribution theorems and their application to the study of linear operators* 451
Kračkovskiĭ, S. N. See Gol′dman, M. A.
Krasnosel′skiĭ, M. A. and Sobolev, A. V. *On cones of finite rank* 1621
Krasovskiĭ, N. N., Subbotin, A. I. and Rossohin, V. F. *Stochastic strategies in differential games* 198
Krass, I. A. *Cooperation of models of economic dynamics* 519
Krivoručko, A. I. *The cardinality and density of spaces of mappings* 281
Kruškal′, S. L. *On a property of limit sets of Kleinian groups* 1497
Kružkov, S. N. *The Cauchy-Dirichlet problem for Hamilton-Jacobi equations of eikonal type* 1344
Kružkov, S. N. and Andrejanov, P. A. *On the nonlocal theory of the Cauchy problem for quasi-linear equations of first order in the class of locally summable functions* 16
Kružkov, S. N., Kastro, A. [A. Castro] and Lopes, M. *Schauder-type estimates and existence theorems for the solution of basic problems for linear and nonlinear parabolic equations* 60
Kublanova, E. M. See Plotkin, B. I.
Kučerenko, È. I. See Gorbunov, A. D.
Kulagina, M. F. See Čibrikova, L. I.
Kuržanskiĭ, A. B. See Kac, I. Ja.
Kušnirčuk, I. F. See Ibragimov, I. I.
Kuz′minyh, A. V. *Characterization of Lorentz transformations* 1626
Kuznecov, N. N. *On stable methods of solving a quasi-linear equation of first order in a class of discontinuous functions* 1569
Kuznecov, N. N. and Tupčiev, V. A. *On an extension of a theorem due to Glimm* 340
Kuznecova, O. I. *On some properties of polynomial operators of triangular form in a space of continuous periodic functions of two variables* 1080
Laptev, G. I. *Conditions for the uniform well-posedness of the Cauchy problem for systems of equations* 65
Ličeva, V. V. *On extension of the averaging interval* 146
Uniform asymptotics for multitype solutions of a nonlinear system with two degrees of freedom 1189
Lavrent′ev, M. M. and Kireĭtov, V. R. *On branch points of optical hypersurfaces* 455

Lavrent′ev, M. M. and Klibanov, M. V. *On an integral equation of the first kind and an inverse problem for a parabolic equation* 422
Leĭbo, I. M. *On closed images of metric spaces* 1292
Leĭtes, D. A. See Berezin, F. A.
Leonov, A. S. *On the construction of stable difference schemes for solving nonlinear boundary value problems* 1241
Leont′ev, A. F. *On the question of representing analytic functions in an infinite convex domain by Dirichlet series* 1574
Levčuk, V. M. *Automorphisms of some nilpotent matrix groups and rings* 756
Levin, A. Ju. *Some questions on the asymptotics for ordinary linear differential equations* 1500
Levin, A. M. *A comparison of various forms of the axiom of choice classical analysis* 1532
Levin, V. L. *On the mass transfer problem* 1349
Extremal problems with convex functionals that are lower semicontinuous with respect to convergence in measure 1384
Levitin, E. S. *On conditions for a local minimum in extremal problems with constraints* 459
On the local perturbation theory of a problem of mathematical programming in a Banach space 1354
On the perturbation theory of nonsmooth extremal problems with constraints 1389
Levitskaja, A. A. See Kovalenko, I. N.
Ležnev, V. G. See Bavrin, I. I.
Linčuk, S. S. See Ibragimov, I. I.
Lisica, Ju. T. *Hopf's classification theorem in the theory of shapes* 1024
